But on the other side it has not been working as usual on my machine so i contacted the developer and he told me it was his fault. So i decide to wait for the next update for fix the bug. For all new users, as i mentioned, on the other side it has not been working as usual on my machine, but i did not say it in the review above, but you can know that in this version of this software, with the patch there is a bug on some system, and the patch is in the review below. Screenshots Minor Bugs But still love the product. 3.0 out of 5 Works good, no bugs, no complaints. It works well, but the software crashes sometimes when i press some foot pedals at the same time, most of the time it happens when i press two foot pedals at the same time, it happens only with the RC1 version. It crashes without giving me an error. I have this bug on windows 10, only on windows 10. Screenshots Minor Bugs But still love the product.
