This application is used to download and save passwords from popular download managers like JDownloader, Yacy Download Manager and Download Accelerator Plus. The program is lightweight and easy to use. What it does: Download and save passwords from multiple download managers to a HTML document. It only needs 2MB of space on your computer. You can view passwords in a simple text format or as a HTML document. Why you need it: Password manager is an indispensable tool that has to be used every time you access one of the websites that stores the logins of other people. We recommend using a password manager so that you will never forget the passwords of the websites that you access. The most popular and fastest file sharing program to download videos, music, software and much more. Its advanced search engine means you can find what you are looking for in seconds with just one search. Key Features: Extremely fast. Takes the 30% of the Internet bandwidth and does the other 70% yourself. So you can download files up to 8x faster! No throttling of download limit! Extended search engine: searches are performed by more than one search engine (Google and YouTube), which makes the search results the fastest and most complete. One-click search: just paste the name of a file and the search starts. Quick image preview: previews of the image in any format (jpeg, gif, png, bitmap etc.) is performed in just one click. Deleting files: all files are backed up before you delete them. Download manager: batch downloading and scheduling. Automatic detection of external stream servers: if you are not connected to the Internet, automatically detects and downloads the files from external stream servers. Amazing GIF image animations: animation of GIF images is the most popular animated icons. Dropbox Instant Upload: upload the files you download or create in any other way to your Dropbox folder in just a few clicks. Banners and cover images for Gmail: an icon in each mail window with a link to download the file in the next window. This is a good way to quickly send the attached file to the user that you are communicating with in Gmail. Drag and Drop file transfer: move the file you want to save or move to another location in just two clicks. This is an efficient alternative to those programs that require the folder where you want to save a file first to be visible.
