What's New in the?

----- CodePorting C#2Java Visual Studio Addin is a light-weight addin for Visual Studio 2010, 2010 Premium, 2012, 2013 or 2015. It helps you to convert your code into Java language. This functionality is provided purely using CodePorting Web APIs (Snippet Porting API, Code Analyser API, Library Management APIs, Projects Management APIs). CodePorting C#2Java feature uses Code Analyzer Web APIs (snippet analyzer API, code analyzer API, library analyzer API, projects analyzer API) to convert C# snippets into Java source code. This feature enables you to use C# language snippets to write Java source code directly from your Visual Studio IDE and will help you to convert the C# source code into Java and C# will be saved in the Java project. Notes: ----- This code conversion addin is not generated or shipped by us, instead it's integrated into your Visual Studio IDE by using Visual Studio extension mechanism. And it also helps you to fix your small changes instantly by editing your code using source code editor. This addin is generated and shipped from CodePorting labs.
