The folks over at Hoosier Heartland actually took some time to take a look at the proposed ban on cell phones while driving. While a ban sounds good in theory, it poses some problems when you stop to consider the ban on drivers' hands-free devices while driving. Here are a few issues that I see with the proposed ban: 1. Will the ban be enforced? If police aren't out there bothering you while you're driving, is there any reason to pass a law? 2. Will a phone ban be enforced if the passenger in the car uses their cell phone? 3. Will the police or state troopers read your text messages? I have no idea how the feds or state police could do this without getting a warrant or

pulling you over. But, I could see a state trooper reading your text message on the side of the road and giving you a ticket. 4. This ban only bans texting while driving. Will texting while driving while using a hands-free device be banned? While all of these points are good ones, I think there's a simple fix that could be implemented that would be far more effective than a ban. In a true hands-free device,

Around the mid-1980s, when my mother was dying of a cancer that no one knew how to treat and the typical response from hospital administrators was not to believe she even had it, my dad looked up the homeopathic remedy that he'd been instructed to administer. He took it with him to the hospital, and soon my mother was declared cancer-free and homeostatically stable. In the years that followed, my dad became a complete believer in homeopathy and would often recommend it to friends who had similar types of illnesses.

I've had conversations with homeopaths over the years who have confirmed his story, and I've always thought that it was one of the many "coincidences" that often accompany the use of alternative treatments. How could a seemingly "random" interaction have led to a complete reversal in my mother's health? But homeopathy doesn't work because of "coincidences," any more than quantum physics or evolutionary biology; it works because it literally works. My father took this remedy to the hospital; when it was given, he responded. This is what distinguishes homeopathy from other forms of alternative medicine, and it is at the core of homeopathy's effectiveness. But when my dad later explained to me how homeopathic remedies are prepared, it
