Then you have come to the right place. I am explaining you the top 5 NetBeans IDE Java3D examples according to this. So if you are looking to create 3d models then this is what you have to do. We are not teaching you how to develop games, just 3d models. If you are still confused then just stay here. The Java3D is a scenegraph based renderer and the model rendering is very detailed. So what comes to your mind when you hear the word 3D? Geometric primitives Cylinders Spheres Torus Interfaces like Simple triangle, quadrilateral etc Texture maps Transforms You name it, they have something special associated with that. If you have learnt some of the above, just start coding. One of the most common and widely used techniques used by 3D programmers is the creation of geometric primitives. Geometric primitives may be very simple geometries like triangles, quadrilaterals or pentagon. Of course, the programs require a
